Sharky is the leading solution to safely store and organize your files, but it doesn't stop there! It's also an awesome photo organization solution, with a powerful Content Centric News Feed and numerous customizable features. And for those who like to keep things a little different, Sharky even offers the ability to write and record notes about anything in the app. A nice and unobtrusive interface In most of the programs that offer file search and organization, you will be asked to select a primary folder where all your data will be stored and updated, while Sharky will do the dirty work. The design of the application is clean and intuitive, a major contrast with the overwhelming number of visual clutter around. If you are not the type of person who is into complex toolboxes, then Sharky will definitely be your thing. The program will allow you to create unlimited number of separate folders where you can add different types of file, which are directly accessible through the program's primary interface. Each file will be given a brief descriptive title, which will help you further classify them as you go along. This way, you can determine quickly which are the documents of interest to you. When you want to modify an existing folder, or remove one from your main locations, you can simply drag-drop the folder name from the drop-down menu to its corresponding location. This step is also covered by the helpful tutorial system. A nice and simple way to keep your files organized Once you start adding items to your folders, Sharky will automatically assign them a number. This way, you will be able to differentiate the files you add and remove from their respective category. When you need to grab something from an existing category, you will only need to define its target path and you are done. On top of that, you can also easily create a different group by renaming the existing ones, if needed. There are no limits to the number of folders you can create, while different items can be assigned different levels of security by using a password protected system. Finding files has never been so easy! If you want to see all the files at once, you can use the Content Centric News Feed that will show you the most recent additions and updates. From there, you can right-click on the folder you are interested in and access its properties page, which will provide you with an easy-to-digest explanation of its contents, as well as the available actions you can perform.
