
DbForge Studio For MySQL Enterprise 8.0.40 Crack [Full]

This function allows you to rename objects in the database and automatically update references to these objects in the entire database. Renaming tables, columns, views, ... occurs when the cursor is in the table header. Tables and columns are renamed when the cursor is within a table or column row. Views and indexes are renamed when the cursor is within the row of a view or column. When you rename a table, the view or index does not change and their contents do not change.
